

FOREIGN MILITARY CARTRIDGE RIFLES AND BAYONETS

The following table lists the most common foreign military rifles, their chambering, along with the most common bayonet types used with each. This list is not exhaustive, but is intended as a quick reference that covers the types most commonly encountered by today's collectors.

A Note Regarding Nomenclature: The blade configuration is listed, in parentheses, following the type. There is no precise dividing line between what blade length constitutes a knife bayonet vs. a sword bayonet. Blades 10-inches or shorter are typically considered knife bayonets. Blades over 12-inches are typically considered sword bayonets. Within the 10-12 inch range, terms are not consistently applied. For purposes of this chart, I have designated any blade over 12 inches as a sword bayonet.

Country	Rifle	Cartridge	Bayonet (type)
Argentina	M1879 Remington Rolling-Block	11.15 x 58R Spanish	M1879 (sword)
	M1888 Commission Rifle	8 x 57 mm.	M1871/84 (knife)
